EXPLANATION OF TABULATED DATA ON FOLLOWING PAGES

Number of Teachers—In this column appears the number of teachers under the supervision of the superintendent, principal or head of department after whose name the number is found. The number after the superintendent's name includes all teachers, supervisors and principals, but not the superintendent; the number after the high school principal's name includes all high school teachers exclusive of the principal; the number after the principal of a ward building includes all the teachers in that building excluding the principal.

Enrollment—The number entered in this column indicates the enrollment in September, 1928, in grades and high schools in the entire district. The district number is indicated after the name of the school. The names appearing after subjects are those of high school or junior high school teachers except in the cases of special departments such as art, music, etc. In these instances the teachers named may devote a part or all of their time to work in the elementary grades.

FIRST CLASS DISTRICTS

(A first class district is one which has a population of eight thousand or more; it employs a superintendent who has had at least five years' experience in public school work; it is controlled by a board of seven trustees.)

THIRD CLASS DISTRICTS

(A third class district is one which has a population of less than one thousand; it employs a principal; it is controlled by a board of three members. Many third class districts have several rural schools in addition to the school listed below. As these rural schools are supervised almost entirely by the county superintendents, they are not included here. Of the following, Brockway, Cohagen, Manhattan, Nashua, St. Regis, Sumatra, and Thompson Falls maintain dormitories. Districts showing no high school enrollment do not maintain high schools. The number of teachers listed below is in addition to the principal. Consolidated districts are indicated by the letter C.)

COUNTY HIGH SCHOOLS

(A county high school is under the control of a principal; it is administered in most cases independently of any school district; funds for its upbuilding and maintenance are derived from a uniform county levy; the board of trustees consists of seven members of whom the county superintendent is one and the remaining six are appointed by the county commissioners. The number of teachers listed is in addition to the principal.)

ACCREDITED HIGH SCHOOLS
1927–1928

High Schools are accredited at the close of each school year for as many years' work as has been done under favorable conditions and according to standards for accrediting adopted by the State Board of Education. Schools designated by the asterisk (*) have failed to meet all requirements for full accrediting and have been given probationary rating.

The fact that a school has been given probationary rating does not deprive its graduates of the privilege of college entrance without examination nor the school of its share in the county tax for high schools. See Standards for Accrediting, No. 24, page 43.

Schools designated by the dagger (†) have discontinued high school work for 1928-1929.

STANDARDS OF THE STATE BOARD OF EDUCATION FOR ACCREDITING HIGH SCHOOLS

Adopted July 27, 1923

1. The time for which schools are accredited shall be limited to one year.

2. Every accredited high school in the state shall keep a permanent record of each pupil's work and attendance.

3. Every accredited high school must teach a minimum of 170 days net in a school year.

4. No school which does not require fifteen units for graduation shall be accredited for four years' work. Sixteen units are recommended.

5. No school shall be accredited when any teacher or teachers, including grade teachers, are selected without the recommendation of the superintendent of such school; in case there is no superintendent, the recommendation of the high school principal shall prevail.

6. It is recommended that the minimum attainment of teachers of academic subjects shall be equivalent to graduation from a standard college requiring the completion of a four-year course of study of 120 semester hours in advance of a standard four-year high school course. It is further recommended that the minimum professional training of all teachers shall include at least twelve semester hours in education. No school shall be accredited which does not comply with the laws of the State of Montana regarding the certification of teachers.

7. The total daily teaching time of any teacher doing full time or part time high school teaching should not exceed 225 minutes; 270 minutes may be assigned without interference with accrediting; in extreme cases, on application, permission may be granted for 315 minutes of daily recitation work.

8. No school whose teaching force in high school consists of fewer than two teachers for full time and one teacher for half time shall be accredited for four years of high school work. No high school employing fewer than two teachers for full time shall be accredited for three years of high school work. No school shall be accredited for two years where the high school requires less than the full time of one teacher.

9. The efficiency of instruction, the acquired habits of thot and study, the general intellectual and moral tone of the school, and the cooperation between school and community are paramount features, and therefore, only schools which rank well in these particulars, as evidenced by rigid, thoro-going, sympathetic inspection, shall be considered eligible for accrediting. (Adopted July, 1927.)

10. No high school shall be accredited unless high standards of work and attainment are maintained in the elementary schools of the district. Especially important are the quality of instruction, the certification of teachers, the number of pupils per teacher, the length of the school term, and the number of teachers in the grades as compared with the number of teachers in the high school.

11. Admittance to advanced standing of pupils from unaccredited schools usually tends to lower the standards both of the school from which they come and of the school which they enter. It is recommended that this practice be discontinued except with unusually well qualified students.

12. Every fully accredited high school shall maintain at all times at least three years of English and require not fewer than three units of English in a four-year course. Four units of English as a requirement for graduation are recommended. The Board will discourage the placing of more than one hundred students per teacher in English classes.

13. A year's work in American history and government equivalent to one unit of credit is required of every high school accredited for three or four years. No student who has not earned one unit of credit in American history and government may graduate from a three or four year accredited high school. A two-unit course in American history and problems of American democracy required in the eleventh and twelfth grades may be substituted for this requirement. (Adopted July, 1927.)

14. No school employing fewer than four high school teachers for full or part time will be accredited for more than two laboratory sciences given during any school year; high schools employing one teacher

for full or part time will not be accredited for more than one laboratory science a year.

15. No school employing fewer than four teachers of academic subjects shall be accredited for more than one foreign language.

16. High school periods shall be not less than forty minutes long exclusive of the time used in passing between classes.

17. The following minimum time requirements for one unit of credit shall be adhered to rigidly; courses requiring fractional amounts of time shall receive corresponding fractional amounts of credit:

Subjects	Minutes per week for 36 weeks	
	Recitation	Laboratory
Academic subjects, such as English, history language, mathematics, etc.	200	.....
Subjects, such as science, requiring recitation and laboratory	120	160
Subjects requiring no outside preparation	.....	400

18. The laboratory and library facilities shall be adequate to the needs of instruction in the subjects taught.

19. The location and construction of the buildings, the lighting, heating and ventilation of rooms, the nature of laboratories, corridors, closets, water supply, school furniture, apparatus, and methods of cleaning shall be such as to insure hygienic conditions for both pupils and teachers.

20. No high school which has fewer than two recitation rooms in addition to the study room shall be accredited for four years of work.

21. No accredited school with limited teaching force shall be permitted to add, without the permission of the accrediting officer, classes or courses which are not accredited.

22. After September, 1928, it will be the policy of the State Board of Education not to accredit high schools in which the average daily attendance of eligible high-school pupils fails to reach the following minimums:

Type of High School	Average Daily Attendance
One year	6
Two year	12
Three year	18
Four year	24

(Adopted July, 1927.)

23. In computing apportionment of money raised by county-wide tax for the support of high schools subtractions shall be made from teaching time and pupil attendance: (a) In all work not accredited, (b) Of all pupils residing outside the county, (c) Of all ineligible pupils.

The following classes of high school pupils are eligible to be counted for apportionment: (a) Those who have passed successfully the state eighth grade examination, (b) Those who have passed successfully the eighth grade examinations given by the superintendent of schools in systems permitted to give their own examinations, (c) All pupils sixteen years of age or over, who desire to enter for special courses and who have passed successfully an examination given jointly by the county superintendent of schools and the principal of the high school. In apportioning county money, the county superintendent of schools shall count the attendance of eligible high school students who have been admitted under (a) and (b). He shall count those admitted under (c) only when they shall have been in attendance fifty days.

24. High schools shall be classified by the State Board of Education, as approved or probationary. Probationary rating may be given schools which fail to meet fully the demands of the standards for accrediting. Schools submitting their reports late or in incomplete form may also be placed on the probationary list. Probationary rating will not interfere with apportionment of county money or with standing of pupils, but is a warning to the school to comply strictly with the demands of the standards for accrediting.

Adopted July 6, 1926

1. A school will not be given probationary rating more than three successive years; the fourth year it will be either approved or dropped.

2. No school violating the same standard in two successive years will be retained on the probationary list unless satisfactory reason for the repetition of the violation is submitted in writing.

STANDARDS OF THE STATE BOARD OF EDUCATION FOR EXEMPTION FROM STATE EXAMINATIONS

Adopted September 20, 1926

(Schools meeting these standards are exempt from state seventh and eighth grade examinations for promotion to high school.)

1. No school shall be accredited which maintains a school term of fewer than 170 days net, exclusive of all vacations and holidays. The length of term of rural schools located within city districts shall be the same as the term of the city system.

2. The school premises, building and equipment must conform to the standards set for a superior rural school and must grade 90% perfect on these points.

3. The teacher in charge of the eighth grade must have at least a regular four-year high school education and two years of normal training, carrying at least 96 quarter credits or an equivalent amount of college or university work including 16 semester hours in education. At least three-fourths of the entire teaching corps of the elementary department of the system must comply with the same qualifications, and all teachers be regularly certificated.

4. Only schools ranking well in teacher tenure, in discipline, instruction and general moral tone, as evidenced by the systematic inspection of any of the constituted authorities, shall be accredited.

5. Schools having no supervision, other than that of the county superintendent of schools, shall follow the state course of study and the periods per week for each of the following subjects shall be five; grammar and composition, reading, arithmetic, history, and civics or physiology.

6. Schools meeting the requirements will be accredited for the current year at the meeting of the State Board next following their recommendation by a constituted authority and will remain on the accredited list for that year, provided no standards are later violated.

7. No school shall be accredited unless the regular blanks furnished by the State Department for this purpose shall have been filled out and sent to the State Superintendent on or before December 1. All blanks shall call for training and tenure of teachers, daily program, and number of minutes per week given to each subject.

TEACHERS' RETIREMENT SALARIES

In accordance with an act of the legislature approved March 8, 1915, teachers who have taught thirty years, the last fifteen years of which have been in Montana, may retire on an annual retirement salary, the exact amount of which is determined by the amount of funds available. Those who were teaching in the State March, 1915, when the law was passed, need to have only the last ten of the thirty years of experience in Montana.

School officials are required to deduct one dollar every month from the salary of every teacher in their employ for the benefit of the retirement salary fund. This applies to all teachers except those actually in the employ of the Montana schools on the date of the approval of the act, who were allowed till January 1, 1926, to decide whether to avail themselves of the law or not, and who did not agree to be bound by the provisions of the act.

SALARIES AND LENGTH OF TERM

City and village schools open in September and remain in session nine or ten months. Rural school terms vary from six to nine months.

MISCELLANEOUS

The Department of Public Instruction cannot give any list of rural schools that will be in session during the summer. Such schools are found in a few counties. They usually open early in the spring and continue for a regular term until late fall. Local conditions and judgment of trustees control the establishment of such schools.

Salaries of teachers in rural schools range from about $600 to $1200 annually; in towns and cities about $900 to $1800.

Salaries of superintendents, principals, and high school teachers are shown in detail on foregoing pages.

No general statement can be made in regard to cost of teachers' board as the variation is great in different localities.

DEMAND FOR TEACHERS

The Department of Public Instruction receives so many inquiries in regard to the demands for teachers in the state, that an individual reply to each is hardly possible. In a certain sense there is a scarcity of teachers in Montana; that is, it is necessary every year to draw in a considerable number of teachers from other states. It is unusual, however, that a city school has any difficulty in finding teachers. The exceptions are chiefly in rural sections. There is no demand in high schools and very little in city and village elementary schools for teachers who are not graduates of standard normal schools or colleges.

ASSISTANCE IN PLACING TEACHERS

The Department of Public Instruction does not maintain a formal placing bureau, but receives many applications and makes frequent recommendations. Application blanks will be sent to prospective teachers upon request. Teachers desiring to make application through agencies will find all leading agencies doing business in Montana.

FURTHER INFORMATION

A circular of information pertaining to teachers' certificates will be sent to any address upon request.

Any reasonable inquiries not covered by the information given above will be cheerfully answered.

MAY TRUMPER,
Superintendent of Public Instruction,
Helena, Montana.
